“ Nothing stops an organization faster than people who believe that the way you worked yesterday is the best way to work tomorrow. ”

- NORMAN VINCENT PEALE

ENTERPRISEONE AND WORLD IMPLEMENTATIONS

Advisional® has an experienced team of consultants who not only know JD Edwards' software, but who have intricate business knowledge as well, enabling them to assist your company in successfully implementing best of class practices. Additionally, with Advisional's® methodology, you can be assured that our years of consulting experience are incorporated into each implementation, taking advantage of every real-world experience.

“ *It is the goal and expectation of Advisional® to cultivate successful long-term partnerships with our clients by consistently delivering exceptional service and value.* ”

ENTERPRISEONE AND WORLD UPGRADES

When upgrading to the latest version of JD Edwards EnterpriseOne, you are able to deploy a modern user interface that increases user productivity via drop down menus and workflows. Having a more intuitive environment lowers training costs and promotes a positive user experience. Additionally, mobility is at the forefront of all the latest application releases, enabling your team to work on multiple mobile platforms, keeping your team connected and productive even when they are outside of the traditional office setting.

Advisional's® team of consultants have performed numerous JD Edwards' upgrades and have the knowledge to help you take advantage of every new functionality, technological advance and enhanced user experience available, making your upgrade a success and user adoption sure.

MANAGED SERVICES

Your back-log is growing, yet you're not quite ready to bring on additional staff. You have a great team; however, you don't quite have the level of expertise needed when those hard to answer questions arise. We've all been there, so Advisional® has built a team of professionals to fill in the gap.

Each customer is unique and so are their requirements. With that in mind, Advisional® begins each Managed Services' Engagement with a thorough assessment of the current environment, strategic corporate goals, initiatives and support needs. Upon completion of the assessment, Advisional® delivers a comprehensive strategy, giving you the assurance that your users will have their questions answered, your system will always be taken care of and those support challenges will always be covered within the response time you expect.

TRAINING AND USER ADOPTION

The system has been implemented; go-live was a success...or was it? Users are still grumbling that the system isn't user friendly, they can't see their transactions, they have no idea how the new processes are supposed to work and can I please just generate a simple report?! Common complaints as almost anyone would attest, but does it really have to be that way?

Advisional® understands that a software implementation or upgrade is not complete until the users are well trained and excited about their new capabilities. Engaging users from the kick-off of any new project, keeping them engaged and then making sure they are well able to maneuver the new system is a strategic key to any company garnering user adoption, thereby substantially increasing their project's rate of success. Advisional's® team of collaborative consultants know how to deliver training, giving users confidence to move forward in their new environment.
